

DOE/EIA-0218(82/37)

Weekly Coal Production

Production for Week Ended:
September 11, 1982

Released for Printing:
September 17, 1982

Highlights

Production of bituminous coal and lignite in the week ended September 11, 1982, as estimated by the Energy Information Administration, was 13,877,000 short tons. This was a decrease of 1,340,000 short tons, or 8.8 percent from production in the previous week due to the Labor Day holiday. Production in the corresponding week of 1981 was 16,385,000 short tons. Bituminous coal and lignite production from January 1 through September 11, 1982 totaled 582,421,000 short tons, up 9.5 percent from production in 1981.

Production of Pennsylvania anthracite in the week ended September 11, 1982, as estimated by the Energy Information Administration, was 105,000 short tons, a decrease of 10,000 short tons or 8.7 percent from production in the previous week. Production in the corresponding week of 1981 was 97,000 short tons. Anthracite production from January 1 through September 11, 1982 totaled 4,340,000 short tons, up 13.3 percent from production in 1981.

FEDEX

...a computerized
index to energy
statistical data from the
Energy Information
Administration

The Federal Energy Data Index or FEDEX is a computerized bibliographic file which provides standard bibliographic information and abstracts for all publications produced by the Energy Information Administration (EIA).

FEDEX is currently accessed through the BRS/USERLINE system (a commercial data base vendor) and the DOE/RECON system (available to DOE employees, major DOE contractors and other Federal agencies).

**For additional
information contact:**
